

Tanathip Pona

Bangkok, Thailand | +66 800687960 | tanathip.pona@gmail.com | Github: p3tchtanathip

EDUCATION

King Mongkut's Institute of Technology Ladkrabang

Aug 2022 - Apr 2026

Bachelor of Engineering in Computer Engineering (GPA: 3.11)

- **Related Coursework:** Object-Oriented Programming, Data Structures, Computer Networks, Database Systems

EXPERIENCE

Stream I.T. Consulting Ltd.

Apr 2025 - Aug 2025

Software Engineer Intern

- Contributed to 3 production enterprise systems, including an internal audit platform for the Rubber Authority of Thailand
- Designed and implemented a multi-level approval workflow with complex business rules and role-based routing using ASP.NET Core and Next.js (TypeScript), PostgreSQL, SQL Server
- Developed reusable reporting modules and optimized large-scale data retrieval using Stored Procedures and SQL

AISIN AUTOPARTS (THAILAND) Co., Ltd.

Sep 2025 - Feb 2026

Software Developer (Freelance)

- Developed a machine monitoring dashboard using C# .NET WinForms and AntdUI for manufacturing operations
- Integrated multiple nut-tightening controllers to collect and visualize torque and angle production data

PROJECTS

APAL - Programming Education Platform (Senior Project)

Jul 2025 - Mar 2026

Full-Stack Developer

- Engineered a production-ready Online Judge platform featuring real-time coding polls, programming exercises, and automated grading for concurrent classroom users.
- Developed a full-stack system using Go and React (TypeScript), integrating Kafka for event-driven processing, PostgreSQL, Redis and RBAC/ABAC security.
- Implemented a secure, multi-language execution sandbox utilizing NSJail and Docker, with WebSocket-based streaming for instant code evaluation feedback.
- Designed containerized infrastructure with Docker, MinIO, Nginx and asynchronous worker services for deployment

MicroWallet - Digital Wallet System (Personal Project)

Apr 2026

Backend Developer

- Engineered a multi-currency wallet system supporting cross-border transfers with atomic transactions and automated currency conversion, ensuring data integrity
- Developed a high-performance ASP.NET Core backend utilizing Clean Architecture and CQRS, integrating OAuth2/JWT, PostgreSQL, and Redis caching.
- Implemented concurrency-safe transaction handling and deployed containerized services on GCE using Docker, Kubernetes (k3s), Terraform, Prometheus, and Grafana

ACTIVITIES & COMPETITIONS

1st Place Winner - Tech Tournament Day 2026 #1

Apr 2026

- Solved real-world software engineering and algorithmic challenges in a workshop competition judged by engineers from Bangkok Bank

ICPC Thailand National Competition Contest

Sep 2024

- Represented KMITL Computer Engineering in Thailand's ICPC regional programming competition

Top 20 Finalist - Hackathon by Digital Youth Network

Aug 2023

- Developed and pitched a web application prototype addressing cyberbullying through online counseling support

SKILLS

- **Skills:** C#, GO, Python, TypeScript, SQL, ASP.NET Core, React, Next.js, PostgreSQL, Microsoft SQL Server, MongoDB, Redis, Kafka, Docker, Kubernetes, Terraform, GCE, WebSocket, SignalR, Git
- **Backend:** REST APIs, JWT Authentication, RBAC, CQRS, Clean Architecture
- **Languages:** Thai (Native), English (Conversational)
