EDUCATION

King Mongkut's Institute of Technology Ladkrabang

Aug 2022 - Apr 2026

Bachelor of Engineering in Computer Engineering (GPA: 3.11/4.00)

Related Coursework: Object-Oriented Programming, Data Structures, Computer Networks, Database Systems

Member: KMITL Startup Hub

SKILLS

Languages: Thai (Native), English (Professional Working Proficiency)

Programming Languages: C#, Go, Python, Javascript, TypeScript, SQL

Framework & Tools: ASP.NET Core, React.js, Kafka, Redis, PostgreSQL, SQL Server, Docker, Git, GCP, Azure

WORK EXPERIENCES

Stream I.T. Consulting Ltd.

Apr 2025 - Aug 2025

Software Engineer Intern | ASP.NET Core, Next.js, SQL, Stored Procedures

- Contributed to 3 production enterprise systems across the full SDLC, applying clean design principles and teamwork across cross-functional teams, including an internal audit platform for the Rubber Authority of Thailand
- Built a 3–5 level approval workflow with automatic routing to the next approver upon submission, replacing a manual paper-based process, with a focus on delivering responsive and intuitive user experiences
- Wrote Stored Procedures for complex multi-table queries with conditional logic

AISIN AUTOPARTS (THAILAND) Co., Ltd.

Sep 2025 - Feb 2026

Freelance Software Developer | C# .NET WinForms, AntdUI, SQL Server

- Designed and shipped a high-performance manufacturing monitoring dashboard aggregating data from 5+ nut-tightening controllers per line across 2 factory sites
- Implemented auto-reconnect with retry and heartbeat logic, eliminating data loss during interruptions

PROJECTS

MicroWallet | ASP.NET Core, PostgreSQL, Redis, Google Cloud Platform (GCP)

Apr 2026

- Personal finance tracker with multi-currency wallets, transaction categorization, and a financial assistant chatbot, built with Clean Architecture and CQRS
- Deployed on GCE via Docker with Redis caching, and tested with xUnit and Moq

APAL | Go, React.js, PostgreSQL, Redis, Kafka, WebSocket

Jul 2025 - Mar 2026

- Built a full-stack automated grading platform, processing submissions through Kafka and returning grades via WebSocket for high-throughput, low-latency feedback, and also supported real-time classroom polls to increase student engagement
- Designed a hybrid RBAC/ABAC permission model with organization and team level access control
- Tested under load and stress conditions before a live pilot with 25+ students at KMITL

Movie2Free | ASP.NET Core MVC, SignalR, PostgreSQL

Mar 2024

- Built a real-time collaborative web app with a responsive interface, letting friends coordinate movie plans and chat without switching apps
- Implemented SignalR-based chat rooms with automatic expiration managed by a background service

EXTRA CURRICULAR ACTIVITIES

1st Place Winner - Tech Tournament Day 2026 #1

Apr 2026

- Demonstrated strong problem-solving skills by solving software engineering and algorithmic challenges judged by engineers from Bangkok Bank under time pressure

ICPC Thailand National Competition Contest

Sep 2024

- Represented KMITL Computer Engineering in Thailand's ICPC regional programming contest
