

Tanathip Pona

Bangkok, Thailand | +66 800687960 | tanathip.pona@gmail.com | github.com/p3tchtanathip

EDUCATION

King Mongkut's Institute of Technology Ladkrabang

Aug 2022 - Apr 2026

Bachelor of Engineering in Computer Engineering (GPA: 3.11)

- **Related Coursework:** Object-Oriented Programming, Data Structures, Computer Networks, Database Systems

EXPERIENCE

Stream I.T. Consulting Ltd.

Apr 2025 - Aug 2025

Software Engineer Intern

- Contributed to 3 production enterprise systems including an internal audit platform for the Rubber Authority of Thailand
- Built a multi-level approval workflow and role-based routing using ASP.NET Core, Next.js and PostgreSQL
- Developed reusable reporting modules and optimized large-scale data retrieval using Stored Procedures and SQL

AISIN AUTOPARTS (THAILAND) Co., Ltd.

Sep 2025 - Feb 2026

Freelance Software Developer

- Built a manufacturing monitoring dashboard in C# .NET WinForms, aggregating data from multiple nut-tightening controllers across the production line for quality traceability
- Implemented auto-reconnect with retry and heartbeat logic, preventing data loss during network interruptions

PROJECTS

MicroWallet - Digital Wallet System

Apr 2026

- Built a multi-currency wallet backend using ASP.NET Core and PostgreSQL, supporting automated currency conversion to ensure data integrity under concurrent load
- Applied Clean Architecture and CQRS with OAuth2/JWT and Redis caching, deployed on GCE via Docker, k3s, Terraform, and GitHub Actions

APAL - Programming Education Platform

Jul 2025 - Mar 2026

- Built an automated grading platform using React, Go and PostgreSQL, enabling students to submit and receive code evaluation results instantly without instructor intervention
- Implemented a real-time interactive poll system using WebSocket and Kafka, allowing teachers to run live quizzes across the classroom, deployed and piloted in a Computer Programming course in KMITL

Movie2Free - Social Movie Scheduling App

Mar 2024

- Built a web app using ASP.NET Core MVC and SignalR that lets friends coordinate movie plans and chat in real time, reducing the back-and-forth of scheduling over separate messaging apps

COMPETITIONS

1st Place Winner - Tech Tournament Day 2026 #1

Apr 2026

- Solved software engineering and algorithmic challenges judged by engineers from Bangkok Bank

ICPC Thailand National Competition Contest

Sep 2024

- Represented KMITL Computer Engineering in Thailand's ICPC regional programming contest

AI Thailand Hackathon 2024 - AI Cooking

Jun 2024

- Built an AI language translation feature using the LANTA supercomputer

42 Bangkok x AWS Hackathon - Future x Smart Hub, Smart Technology using AI

Aug 2023

- Designed a Smart Football Glasses Assistant using OpenCV and YOLO for real-time player and space detection

Top 20 Finalist - Hackathon by Digital Youth Network

Aug 2023

- Developed and pitched a web application prototype addressing cyberbullying through online counseling support

SKILLS

- **Languages:** Thai (Native), English (Conversational)
- **Programming Languages:** C#, Go, Python, TypeScript, SQL
- **Frameworks:** ASP.NET Core, React, Next.js, SignalR, Node.js, Express.js
- **Databases:** PostgreSQL, SQL Server, MongoDB, Redis
- **DevOps:** Docker, Kubernetes, Terraform, Kafka, GitHub Actions, GCE, Nginx
